EDUCATION

SaiGon University <i>Software Engineering</i>	March 2026 <i>Current GPA: 3.27/4.0</i>
---	--

TECHNICAL SKILLS

Languages: Java, PHP, C#, JavaScript (ES6+), SQL, TypeScript Frameworks: Spring Boot, Laravel, .NET Core, Next.js, React, Node.js Databases: MySQL, PostgreSQL, SQL Server, Redis (Caching), MongoDB Tools & Technologies: Git/GitHub, Docker, RESTful API, WebSocket, RabbitMQ
--

PROJECTS

Movie Ticket Booking System <i>C#, .NET Core, PostgreSQL, WebSocket, Redis</i>	Nov. 2025 – Present
- Engineered a high-concurrency backend to handle real-time seat status updates using WebSocket, preventing double-booking issues during peak hours. - Implemented Redis caching to optimize movie showtime queries, reducing database response time by 40%. - Integrated VNPAY payment gateway and automated ticket confirmation via Java Mail Sender.	
Tour Management Platform <i>PHP, Laravel, MySQL, Cloudinary, REST API</i>	Jan. 2026 – Present
- Architected a comprehensive tour booking system with Role-Based Access Control (RBAC) for Admins, Tour Providers, and Customers. - Designed an optimized database schema for complex search filters including location, price range, and availability using Eloquent ORM. - Utilized Cloudinary for efficient media management and implemented secure authentication using Laravel Sanctum.	
Volunteer Campaign Hub <i>Java, Spring Boot, MySQL, Docker</i>	Sept 2025 – Dec. 2025
- Developed a centralized platform for managing charity campaigns, volunteer registrations, and donation tracking. - Applied Docker containerization to ensure consistent development and deployment environments. - Built an analytical dashboard to visualize campaign progress and financial transparency for donors.
